Objective

Looking to switch careers into my first junior developer role. I don't have any formal experience in the tech industry, but I've been building some personal projects for my portfolio in order to learn more programming skills.

Skills

HTML5, CSS, JavaScript, TypeScript, React JS, Material UI, Bootstrap, Git, Github, Swift, Xcode

Experience

Personal Projects:

Front-End Web Development

Spotify Clone

Using React JS, CSS, and JavaScript building a clone of Spotify. Accessed Spotify's API to pull the user's data to use it for the application. Has a player feature and displays user's playlists once they log in and are authenticated through Spotify.

Music Store

Built an ecommerce website using CSS, HTML, and JavaScript. Created a login feature to store user data and greet them on the homepage. Part of it has a shop page which stores the items to local storage for the user until checkout.

iOS Development

Music Player App

Built a music app for iPhone. Working music player with local songs saved to it. Has options for play, pause, and skipping tracks. Tools used were Swift and Xcode.

Education

Rutgers University

Bachelor of Arts - graduated 2019

Majored in English Literature and minored in Psychology

New Brunswick, NJ

Franklin High School

High School Diploma - graduated 2015

Somerset, NJ
