

Jamie Gist

Front-End and iOS App Developer

New York, NY

732-874-4597

Portfolio: <https://jamiegist.netlify.app/jamie.gist.7@gmail.com>

GitHub: <http://www.github.com/jamieblue4>

Objective

Looking to switch careers into my first junior developer role. I don't have any formal experience in the tech industry, but I've been building some personal projects for my portfolio in order to learn more programming skills.

Skills

HTML5, CSS, JavaScript, TypeScript, React, Bootstrap, jQuery, JSON, Git, Github, Swift

Experience

Personal Projects

Front-End Web Development

Spotify Clone App

Using React, CSS, and JavaScript building a clone of Spotify. Accessed Spotify's API to pull the user's data to use it for the application. Built a search feature to show the user of the app the artist, album, etc. they searched for.

Music Store

Built an ecommerce website using CSS, HTML, and JavaScript. Created a login feature to store user data and greet them on the homepage. Part of it has a shop page which stores the items to local storage for the user until checkout.

iOS Apps

Tic-Tac-Toe Game

Built a simple game of Tic-Tac-Toe with XCode and using Swift. Includes a scorecard for the players, new game function, and cases for draws and wins.

Education

Rutgers University

Bachelor of Arts - graduated 2019
English Literature and minor in Psychology
New Brunswick, NJ

Franklin High School
High School Diploma - graduated 2015
Somerset, NJ
