Experience

Front-End Web Development

Sky Blue Records Web Store

Built an ecommerce website with JavaScript, HTML, CSS, and Bootstrap. It has a complete homepage, about page, and shop page. Functional cart for adding/removing items and a simple checkout feature. Added a user registration and log in feature that stored data using MySQL and Python. Hosted with a domain name for easy access.

URL: <https://skybluerecords.netlify.app/>

Spotify Clone

Using React JS , CSS, and JavaScript building a clone of Spotify. The application is hosted on Firebase to take care of the backend part. Accessed Spotify's API to pull the user's data to use it for the application. Authenticates the user's data and logs them in to the web app. Has a player feature and displays user's playlists once they log in and are authenticated through Spotify. Created a database with JSON to store user login data.

iOS Development

Music Player App

Built a music app for iPhone. Working music player with local songs saved to it. Has options for play, pause, and skipping tracks. Tools used were Swift and Xcode.

Technologies

HTML, CSS, JavaScript, TypeScript, React JS, Python, Git, Github, Swift, Xcode

Other Skills

Material UI, Bootstrap, JSON, Apache, MySQL

Education

Rutgers University
