## Projects

### Ecommerce Site

Built a full ecommerce website with a landing page, shopping cart, and web store. Includes a check out feature and keeps track of items in the user's shopping cart in local storage. Hosted with a live domain for easy access and use. Tools used were CSS, HTML, Bootstrap, and JavaScript. URL is <https://skybluerecords.netlify.app/>

### Spotify Clone

Using React, I created a clone of the Spotify desktop site. Used an API to enable the user to actually log into their real account. Used Firebase for the backend hosting to make it less complicated. Repository can be found at:  
<https://github.com/jamieblue4/web-music-player>

---

## Technologies and Other Skills

HTML, CSS, JavaScript, TypeScript, React JS, Python, Git, Github, Material UI, Bootstrap

---

## Education

*Rutgers University*

2015 - 2019

**Bachelor of Arts**

New Brunswick, NJ

Majored in English Literature and minored in Psychology

*Franklin High School*

2011 - 2015

**High School Diploma**

Somerset, NJ
