Experience

Front-End Web Development (Personal Projects)

Spotify Clone

Using React JS , CSS, and JavaScript building a clone of Spotify. Accessed Spotify's API to pull the user's data to use it for the application. Has a player feature and displays user's playlists once they log in and are authenticated through Spotify.

Ecommerce Store

Built a simple ecommerce website with JavaScript, HTML, and CSS. It has cart functionality and a checkout feature.

iOS Development (Personal Project)

Music Player App

Built a music app for iPhone. Working music player with local songs saved to it. Has options for play, pause, and skipping tracks. Tools used were Swift and Xcode.

Skills

HTML5, CSS, JavaScript, TypeScript, React JS, Material UI, Bootstrap, Git, Github, Swift, Xcode
