Objective

Looking to shift careers from customer service into a junior developer role. I've been teaching myself programming for the past year and am open to working onsite.

Experience

Personal Projects

Music Store

Plan and build a dummy ecommerce website using CSS and HTML. Revising and adding to the design as needed.

Sign Up Form

Brainstorm and create a landing page with a responsive sign up form. Tools used were HTML, CSS, and JavaScript. Made sure to include form validation and explanatory error messages for the user.

Spotify Clone App

Using React, CSS, and JavaScript building a clone of Spotify. Accessed Spotify's API to pull the user's data to use it for the application.

Education

Rutgers University

Bachelor of Arts - graduated 2019
English Literature and minor in Psychology
New Brunswick, NJ

Franklin High School

High School Diploma - graduated 2015
Somerset, NJ
