Objective

Looking to switch careers from customer service into my first junior developer role. I don't have any formal experience in the tech industry, but I've been building my own personal projects in my portfolio to learn more programming skills.

Skills

HTML5, CSS, JavaScript, TypeScript, React, Bootstrap, jQuery, JSON, Git, Github

---

Experience

Personal Projects

Spotify Clone App

Using React, CSS, and JavaScript building a clone of Spotify. Accessed Spotify's API to pull the user's data to use it for the application. Built a search feature to show the user of the app the artist, album, etc. they searched for.

Music Store

Built an ecommerce website using CSS, HTML, and JavaScript. Created a login feature to store user data and greet them on the homepage. Part of it has a shop page which stores the items to local storage for the user until checkout.

Education

Rutgers University
Bachelor of Arts - graduated 2019
English Literature and minor in Psychology
New Brunswick, NJ

Franklin High School
High School Diploma - graduated 2015
Somerset, NJ
